"Today, all the five elements (earth, water, fire, air, and space) are polluted and, consequently man is mired in insecurity. Today the world is losing its ecological balance as man, out of utter selfishness, is robbing mother Earth of her resources like coal, petroleum, iron, etc. As a result, we find earthquakes, floods, and such other devastating natural calamities. Human life will find fulfillment only when ecological balance is maintained. Balance in human life and balance in Nature, both are equally important."

- Sathya Sai Baba, Divine Discourse, 25 September 2000
